

# Sensor Solutions for Hospitality

When it comes to managing your hospitality business, it is important to keep track of all aspects of your operation. Effective monitoring can have a big impact on the safety and efficiency of your business, helping to avoid costly downtime, damage, and other issues.

However, monitoring your people, situations, and assets can be a challenge. Manual checks can be time consuming, expensive, and prone to error.

Sensor Solutions from Stargent allows you to monitor a wide variety of situations from one system, so you can ensure your operations run smoothly and your people and assets are protected.

This solution provides:

- 24/7 remote monitoring
- Instant alerts for issues
- Actionable data & reports
- Mix and match sensors
- Quick and easy setup
- Web-based portal

## Select and combine sensor applications, including:

### Housekeeper Panic Buttons

Meet legal and brand mandates and ensure worker safety by providing wearable buttons that can be used to alert security in case of an emergency and accurately report location.

### Predictive Maintenance

Prevent failures, reduce downtime, and save money with this powerful wireless sensor that monitors motors, compressors, pumps, and more!

### Leak Detection

Avoid costly repairs. Receive alerts when water is detected in areas where appliances are present; such as water heaters, sinks, utility closets, and bathrooms.

### Indoor Asset Tracking

Easily track high-value indoor assets with 24/7 on-demand location reporting to improve business efficiency and reduce operating costs.

### Indoor Air Quality

Create an optimal environment with indoor air quality monitoring. Protect guest and employee health and meet indoor air quality regulations.

### Legionella Monitoring

Ensure water temperature is in the correct range to avoid the growth of the legionella bacteria that contaminate water sources and harm the health of employees and guests alike.

### Temperature Monitoring

Monitor temperature conditions of walk-in coolers, freezers, and more to maintain proper food safety across the property and ensure health agency compliance 24/7.

### HVAC Monitoring

Know when it's the right time to replace HVAC filters to ensure proper air quality and ventilation. Optimize your HVAC system while reducing operating costs.

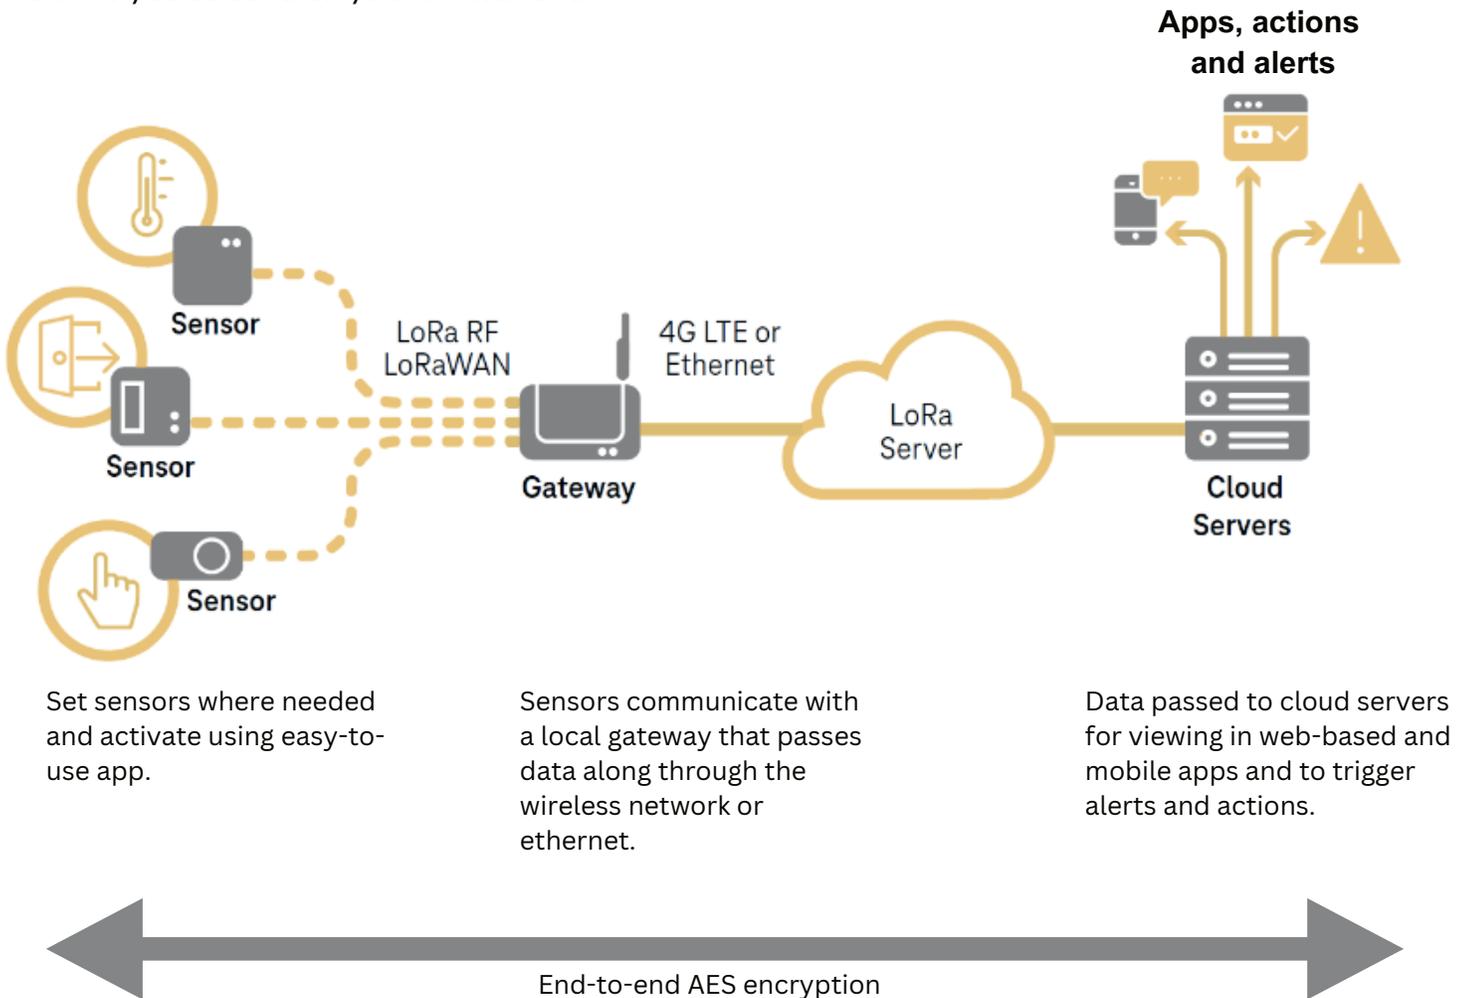

### Service Request

When stock needs refilling, staff and customers can push the button next to the items to send an alert and a replenishment order to the appropriate party.

# A SCALABLE, END-TO-END REMOTE MONITORING SOLUTION FOR HOSPITALITY

Choose from a variety of easy-to-deploy sensors that connect wirelessly to a single gateway to create a custom solution that answers the operational needs of your hospitality business and allows you to build on your investment.
